The Most Spacious and Comfortable MRI Scanner in the City

Lakeway, TX (June 7, 2013) — Lakeway Regional Medical Center (LRMC) features the Optima* MR450w 1.5T with GEM Suite coil technology. This advanced system from GE Healthcare is designed to help maximize comfort for patients undergoing MRI exams. Some of the features include a 70 cm wide bore allowing ample space for patients to feel unencumbered instead of the conventional 60 cm MRI. There is also a table surface with varying cushion densities that is designed to alleviate pressure points. The length of the scanner is also shortened so that most exams can be accomplished with the patients head out of the scanner, or positioned at the opening, allowing any claustrophobic patient to feel comfortable and relaxed. Many patients who have required sedation in the past are now able to complete their MRI scans without any type of medication. This system also delivers uncompromised imaging capability for your physician. Experience the balance of advanced technology and comfort during your next exam. Patient testimony: I am claustrophobic and always needed sedation when my doctor ordered MRI's for me. This scanner was so comfortable I didn't need any medication at all.

We invite you to schedule services by contacting:

LRMC Radiology Department at 512-571-5304

About Lakeway Regional Medical Center

Lakeway Regional Medical Center brings experience, advanced technology and best practices to provide high-quality care for patients. Since opening in April 2012, LRMC has been providing comprehensive, compassionate and modern medical treatment. As a full-service hospital with board-certified physicians, LRMC manages everything from emergencies to outpatient procedures. Ranked among the top 10 percentile of hospitals nationwide by Healthstream, an independent research company for outpatient services in 2012. For more information about LRMC, visit lakewayregional.com or call 512-571-5000.
